Cataract surgery pre-operative instructions

1. Obtain the prescribed drops from the pharmacy before surgery.
2. You will receive a phone call before the surgery date informing you of the time of arrival to the surgery center.
3. **Starting on _____ or the day before surgery, place 1 drop of Prednisolone and Ketorolac in the (right / left) eye 3 times a day and also one drop of each the morning of surgery(shake well before use).** You will continue these drops after surgery for 4 weeks.
4. **Nothing to eat or drink after midnight the night before surgery.**
5. Take your normal medications the morning of the surgery with only a sip of water unless directed differently by your doctor.
6. No eye makeup. Most jewelry will be removed. You will change into a gown so dress comfortably.
7. You must have a responsible person drive you to and from your procedure.
8. Bring a photo ID and your insurance cards with you.
7. Please call our office if you have any questions. (732)988-4000.
